

IOAccessClient::command

IOAccessClient::monitor

IOAccessClient::waitForCommand

IOAccessClient::getAndSet  
Example

```
graph LR; A[IOAccessClient::command] --> D[IOAccessClient::getAndSet Example]; B[IOAccessClient::monitor] --> D; C[IOAccessClient::waitForCommand] --> D;
```

The diagram illustrates three separate method calls on the left, each represented by a white rectangular box with a black border. These boxes are arranged vertically. From the right side of each box, a blue arrow points towards a single, larger rectangular box on the right. This target box has a light gray fill and a black border. It contains the text 'IOAccessClient::getAndSet' on the top line and 'Example' on the bottom line. The arrows originate from the right edge of the 'IOAccessClient::command' box, the right edge of the 'IOAccessClient::monitor' box, and the right edge of the 'IOAccessClient::waitForCommand' box, all converging on the left edge of the target box.
